### **DETAILED ACTION**

Claims 1-7 are pending in the application.

#### ***Election/Restrictions***

1. Applicant's election with traverse of Group I in the reply filed on December 3, 2009 is acknowledged. The traversal is on the ground(s) that there would be no undue burden to search the other Groups. This is not found persuasive because the compounds of formula II and VII are intermediates and the compounds of formula I are the final products. A search of quetiapine of claims 1-4 is not inclusive of the intermediates and thus a separate search of each intermediate is independent of the other. Quetiapine of formula I differs significantly in chemical structure from the intermediate compounds of formulae II and VII, which are substituted piperazines and hydroxyl protected compounds, respectively, and thus are separately classified and a search for one would not yield the other.

Note MPEP 2173.05(h) "where a Markush expression is applied only to a portion of a chemical compound, the propriety of the grouping is determined by a consideration of the compound as a whole, and does not depend on there being a community of properties in the members of the Markush expression. Therefore, what should be considered for patentable distinctness is the compound as a whole. Would a whole compound where the compound is a compound of formula II or VII be patentably distinct from a whole compound where the compound is quetiapine? If a reference for one would not be a reference for the other, then restriction is considered proper. It is the compound as a whole quetiapine of formula I vs. Benzoic acid 2-{2-[4-(2-phenylsulfanyl)-

Art Unit: 1624

phenylcarbamoyl)piperazin-1-yl]-ethoxy}-ethyl ester of formula II vs. Benzoic acid 2-[2-(4-dibenzo[b,f][1,4]-thiazepin-11-yl-piperazin-1-yl)-ethoxy]-ethyl ester of formula VII, etc., that must be considered for patentable distinctness.

Thus, separate searches in the literature would be required. However, should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 5-7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on December 3, 2009.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The following reasons apply:

Art Unit: 1624

- a. Claim 1 and claims dependent thereon are vague and indefinite in that it is not known what is meant by general formula II. A formula is not general when all of the variables are defined. Deletion of "general" is suggested.
- b. Claim 4 is vague and indefinite in that it is not known what is meant by "and" which appears after the definition of R1 and R2.
- c. Claim 4 is vague and indefinite in that it is not know what is meant by "derivative" which implies more then what is positively recited.
